

MOHAMAD IZZAD BIN MOHAMAD HASLI

izzadhasli25@gmail.com

+60 11-15838648

Ipoh, Perak

PROFESSIONAL SUMMARY

A high-achieving Computer Science student from UiTM Tapah with a consistent **Dean's List (GPA 3.5+)** track record. Proficient in **System Development** and **Network Administration**, with a solid technical foundation in **Object-Oriented Programming (Java/C++)** and **Database Management**. Possesses a keen interest in **Multimedia** and visual programming. A fast learner with strong logical thinking, seeking to apply analytical problem-solving skills during the 2026/2027 industrial training period."

TECHNICAL SKILLS

Technical:

- **Programming & System Development:** Proficient in Object-Oriented Programming (Java and C++) with experience in developing web and mobile applications, creating dynamic user interfaces, and applying software development principles.
- **Database Management:** Skilled in designing and managing relational databases using SQL, with a strong understanding of database management concepts to ensure data integrity and efficient data retrieval.
- **Network & Operating Systems:** Solid understanding of Data Communication and Networking protocols, coupled with hands-on knowledge of **Fundamentals of Operating Systems** for system configuration and maintenance.
- **Software & Diagnostic Tools:** Competent in using Visual Studio, BlueJ, Notepad++, and MySQL for coding, debugging, and application development.
- **Logic & Algorithms:** Strong foundation in algorithm design, data structures, and programming paradigms to develop clean, optimized, and efficient solutions.
- **Languages:** Excellent proficiency in Malay and intermediate proficiency in English, both in written and spoken communication.

RELEVANT COURSEWORK

Programming & Development

- **Object-Oriented Programming:** Focus on Java, classes, and inheritance.
- **Web & Mobile Application:** Development of responsive digital interfaces.
- **Database Management:** SQL and relational database design.
- **Information System Development:** End-to-end system development life cycle.

Networking & Systems

- **Data Communication & Networking:** Network protocols and OSI layers.
- **Operating Systems:** Process and memory management for Windows/Linux.

Multimedia & Foundations

- **Interactive Multimedia:** Design of interactive digital content.
- **Visual Programming:** Graphical User Interface (GUI) development.
- **Data Structures & Algorithms:** Efficient data organization and logic design.

INTERNSHIP OBJECTIVES

Availability: 7 September 2026 – 19 February 2027

Dedicated and high-achieving Computer Science student seeking a 24-week industrial training position to contribute technical skills and gain professional experience in a fast-paced environment. Aiming to specialize and add value in the following areas:

- **System Development:** To participate in the full Software Development Life Cycle (SDLC), including designing, coding, and testing web or mobile applications.
- **Network Infrastructure:** To assist in network configuration, troubleshooting, and maintaining secure data communication systems.
- **Multimedia & UI/UX:** To apply creative and technical skills in developing interactive digital content and user-centric interfaces.

WORK EXPERIENCE

Flea Market Ipoh | Retail Assistant (Bundle Clothing)

- **Demonstrated product** expertise by identifying quality materials, brands, and trends to **assist customers** in their selections.
- **Utilized persuasive communication and negotiation skills** to finalize sales and build a loyal customer base.

ACADEMIC ACHIEVEMENTS

- **Dean's List (3 Semesters):** Consistently maintained a **GPA(3.81) above 3.50** within the Computer Science program.
 - Semester 1 = 3.95
 - Semesters 2 = 3.68
 - Semesters 3 = 3.8
- **High Achiever SPM:** Awarded for excellent academic performance in SPM (7A, 1B, 1C)
